

Part B Insider (Multispecialty) Coding Alert

Correction:

Our article "Prevent Uni-Bi Reporting Errors With This Expert Insight" in the Insider, Vol. 10 Number 13, indicated that you should report two units of 92135-50 (Scanning computerized ophthalmic diagnostic imaging, posterior segment; bilateral procedure) when the physician performs this service on both eyes.

The correct way to report this procedure is to report just one unit of 92135-50. Thanks to **Lexa Peterson** with Illinois Eye Center for pointing out the error.
