

## Part B Insider (Multispecialty) Coding Alert

### Deleted Edits: Good News for Billing 97750

#### Physical performance tests no longer bundled

If your physician regularly performs physical performance tests and bills [CPT 97750](#) for them, it has just become a lot easier to receive payment for those tests with a range of therapeutic procedures.

The latest version of the National Correct Coding Initiative removes five edits that bundled 97750 as a component of 97110-97124. These codes cover therapeutic procedures to develop strength, range of motion and flexibility, plus neuromuscular re-education of movement, aquatic therapy, gait training, and massage.

In other words, as of Oct. 1, you can test physical performance and provide therapeutic exercises on the same day.
