

## Part B Insider (Multispecialty) Coding Alert

### WHAT DOCS CAN BILL

Currently, physicians performing stereotactic radiosurgery can bill 99201-99245 for the initial visit, plus 77623 for clinical treatment planning, [CPT 77295](#) for 3D simulation/plan, including isodose plans, one unit of 77300 for each basic calculation, one unit each of 77334 for each treatment device, and 77432 for treatment management, according to **Cindy Parman** with **Coding Strategies** in Powder Springs, GA. Also, if the physician performs SRS using a linear accelerator instead of Cobalt 60, the physician can bill 77280-77290 for any simulations, as long as they occur on a separate date.
