Clip & Save ~ Get a Sneak Peek at Proposed ICD-9s for 2008

Speech-language pathology gets a heap of new codes

TCI sifted through CMS' Inpatient Prospective Payment System Notice of Proposed Rulemaking (IPPS NPRM) to find the SLP-related code additions and changes that will specifically affect you. Take a glance at the soon-to-be codes, and see where your diagnoses will have to be much more specific.

Note: The final addendum with complete information on changes to the diagnosis part of ICD-9-CM will be posted on CDC's Web page at www.cdc.gov/nchs/icd9.htm, according to CMS.
