

## Eli's Rehab Report

### Correction: ADL Training

In the November 2000 Physical Medicine & Rehab Coding Alert, the reader question Billing OT Evaluation With ADL Training on page 87 should have stated that the occupational therapist (OT) must perform the occupational therapy evaluation ([CPT 97003](#)) personally. In most states, an OT assistant is licensed to provide most treatment codes, including 97535 (self care/home management training [e.g., activities of daily living (ADL) and compensatory training, meal preparation, safety procedures, and instructions in use of adaptive equipment] direct one-on-one contact by provider, each 15 minutes).
