

## Eli's Rehab Report

### Sample Document: Streamline Patient Referrals With This Checklist

**Use this tool to take the guesswork out of determining when therapy is the best option.**

While you can spot a patient in need of therapy from a mile away, physicians or assisted-care staff aren't as well-trained.

Best: Distribute a form similar to the one below, created by **TMF Health Quality Institute**, to physicians and other care providers in your area. Be sure you add your contact information, including your web address, so that providers can get in touch easily if they have a referral.
