

Outpatient Facility Coding Alert

Reader Question: Look at the Location, Depth and Procedure Complexity for Sialolithotomy

Question: Please provide me with the correct CPT® codes for when the physician uses micro burr to remove salivary stones.

Pennsylvania Subscriber

Answer: You should choose from the following range of codes depending on the location/depth and complexity of the procedure:

- 42330 □ Sialolithotomy; submandibular (submaxillary), sublingual or parotid, uncomplicated, intraoral
- 42335 □ Sialolithotomy; submandibular (submaxillary), complicated, intraoral
- 42340 □ Sialolithotomy; parotid, extraoral or complicated intraoral.
