

## Psychiatry Coding & Reimbursement Alert

### Reader Questions: Here's How to Get ICD-10 Savvy

**Question:** Our entire office is pitching in to prepare for the switch over to ICD-10 diagnosis codes this Fall. I've been put in charge of a team that will formulate and manage our ICD-10 transition plan. I'm looking for resources that will help with our transition plan; can you help?

Tennessee Subscriber

**Answer:** First, and foremost, experts recommend getting a current ICD-10-CM book to review not only the codes, but also the ICD-10 directions and guidelines.

As an addendum to the ICD-10 books, the Centers for Medicare & Medicaid Services (CMS) has ICD-10 help online. CMS has launched a site replete with ICD-10 review tools, crosswalks, and advice on how to stay ahead of the curve with ICD-10. CMS calls its site, [www.roadto10.org](http://www.roadto10.org), "your one-stop source for all things ICD-10." You'll find advice on building your ICD-10 transition plan and ICD-10 resources, tutorial videos, a template library, Webcasts, and more. The site also includes a Frequently Asked Questions (FAQ) section, which you will definitely find handy.

**ICD-10 lists:** One FAQ asks: "Where can I find a list of ICD-10 codes?" According to CMS, "The ICD-10-CM and ICD-10-PCS code sets, as well as the official ICD-10-CM guidelines, are available free of charge on the "2015 ICD-10-CM and GEMs" and "2015 ICD-10-PCS and GEMs" pages of the CMS ICD-10 website. Additionally, it is important to contact your payers and trading partners to request a copy of the crosswalk mapping tool they are utilizing to ensure its accuracy."

Roadto10 also sports a nifty little tool for specialty-specific ICD-10 preparation: crosswalks for the top 10 diagnosis codes by specialty.
