

## Eli's Hospice Insider

### **Hospice News: CMS Offers Helping Hand With Free Training On Quality Data Reporting**

**Access information on overall program as well as data specifics.**

You can get some help from Medicare on hospice quality data reporting and submission. A link to a WebEx training session on that topic is at [www.qtso.com/hospice.html](http://www.qtso.com/hospice.html), the **Centers for Medicare & Medicaid Services** says on the QIES Technical Support Office website.

The training session covers topics ranging from how to access the data entry form to navigating the two measures' data entry, attestation and submission requirements, CMS says. The WebEx also covers basics of data reporting requirements in the first year and future years.
