Hospice News: Keep An Eye On Compliance Hot Spots

Want to see what CMS and the OIG are keeping tabs on? You can tune in to CMS's Provider Compliance Group outreach listening session addressing hospice topics, which took place in August. The session is available via computer rebroadcast until Nov. 23 at noon.

CMS held a series of such calls to address topics ranging from hospice to power mobility equipment. "The purpose of these calls is to educate providers and suppliers to address specific vulnerabilities identified in **Office of Inspector General** reports," CMS said in announcing the calls.

A link to each of the three calls is available at www.cms.gov/OpenDoorForums/Downloads/August2011PCGCallsNotice.pdf.
