Hospice News: Reset Your CMS Bookmarks

It seems to be a regular occurrence, but can still be a hassle. It's time to reset your bookmarks for CMS's website.

"Bookmarked URLs are redirected to the index webpage for that topic," CMS says in a message to providers. Items posted under "Downloads" section should be unaffected.

Do this: "On the index page, select the webpage you'd like to view from the left-hand side. Once you open the correct page, you can create a new bookmark," CMS instructs.

The new address for CMS's Hospice Center website is www.cms.gov/Center/Provider-Type/Hospice-Center.html.
