### Hospice News: West Virginia Hospice Plans New Inpatient Unit

**CAMC Memorial Hospital and HospiceCare** will team up in Charleston, West Virginia, to open a 12-bed inpatient hospice facility in the hospital, reports WSAZ TV. HospiceCare has two other inpatient facilities, including one at another hospital, the TV station notes.

The average stay for a HospiceCare patient in the hospice facility is five days, while it's 65 days for those served at home, WSAZ says.
