

## Eli's Hospice Insider

### Quality: Know The 7 Hospice Compare Measures From Treatment Preferences To Bowel Regimens

**Plus: Eight more CAHPS measures are coming this winter.**

Unless you don't meet the data threshold requirements for Hospice Compare, these are the measures for which you are displaying data on Medicare's newest outcomes comparison website:

Treatment Preferences □ **National Quality Forum** #1641

Beliefs/Values Addressed □ NQF #1647

Pain Screening □ NQF #1634

Pain Assessment □ NQF #1637

Dyspnea Screening □ NQF #1639

Dyspnea Treatment □ NQF #1638

Patients treated with opioids who are given a bowel regimen □ NQF #1617.

And you'll show more patient-satisfaction-driven data when the CAHPS-based measures go live this winter, the **Centers for Medicare & Medicaid Services** indicated in its 2017 payment rule:

Rating of Hospice

Hospice Team Communications

Willingness to Recommend

Getting Hospice Care Training

Getting Timely Care

Getting Emotional and Religious Support

Getting Help for Symptoms

Treating Family Member with Respect.
