

## Long-Term Care Survey Alert

### 5-Star Program Uses 10 Publicly Reported Quality Measures

**Pay special attention to 2 of these measures.**

Long-stay residents:

- Percent of residents whose need for help with daily activities has increased.
- Percent of residents whose ability to move in and around their room got worse.
- Percent of high-risk residents who have pressure sores.
- Percent of residents who had a catheter inserted and left in their bladder.
- Percent of residents who were physically restrained.
- Percent of residents with urinary tract infections.
- Percent of residents with moderate to severe pain.

Short-stay residents:

- Percent of residents with pressure sores.
- Percent of residents with moderate to severe pain.
- Percent of residents with delirium.

**Note:** The two ADL measures constitute 40 percent of the overall weight on the long-stay measures, states CMS.
