Staff Education Tip: Roll Out The Posters For Infection Control

Engage staff in the battle against the bugs.

To inject a little fun into staff education and prevent flu to boot, sponsor a facility-wide poster contest on infection control.

Then display the posters as infection-control tools throughout the facility--for example, put one in the medication room, others in the halls and other places to remind people of the basics, suggests **Judy Gross, RN, C, CDONA/LTC, RAC-C**, a consultant with **LBK Health Care Inc.** in Dayton, OH.

Pass the imagination: If you have a creative idea to improve patient care, staff education or other quality improvements, please share it with other Long-Term Care Survey readers. Contact the editor at 615-370-5042 or editormon@aol.com.
