Coding Quizzer: Code This Resident's Toilet Use

Scenario: Mrs. M has had bouts of vertigo. One staff person must assist and support her as she transfers to the bedside commode. How would you code the resident's ADL self-performance and support provided in Section G?

Answer: Code self performance as a "3" and support provided as "2." Coding rationale: The resident partially participates in the task and one staff member is required to assist her. Source: Resident Assessment Instrument user's manual, page 3-86.
