

## MDS Alert

### Coding Quizzer: Coding ADLs

Section G: How would you code this resident's ability to walk in the corridor?

After receiving a new cane, Mr. X needed to be observed the first time he used it as he walked up and down the hall on his unit to ensure he used the cane appropriately. He does not require any additional staff assistance.

**Answer:** Self-performance = 0

Support provided = 0

Rationale: Resident requires no set up to complete task independently.
