### **Coding Quizzer: Rest Easy--Double Check Your Bed Mobility Coding Ability**

#### **Ready, set, code...**

Test your ADL assessment prowess by coding this RAI user's manual bed-mobility scenario:

Mr. Q has slid to the foot of the bed. Two staff members must physically lift and reposition him toward the head of the bed. Mr. Q was able to assist by bending his knees and pushing with his legs when reminded by the staff.

Self-Performance = 3

Support Provided = 3

Coding rationale: Resident partially participates in the task. Two staff members are required.
