

OASIS Alert

Clip & Save: REFER TO THIS CHECKLIST TO REDUCE FALLS RISK

Spot and eliminate potential problems before patients stumble over them.

You don't have to reinvent the wheel when trying to satisfy OASIS C's requirements and improve your agency's outcomes. The **Home Health Quality Improvement (HHQI) National**

Campaign has created best-practices packets any agency can immediately put to use -- so long as you register for the campaign.

Example: This checklist of potential interventions for preventing falls is only one of the many tools and resources available to registered agencies. Incorporate it into your assessment process to help your patients while improving your scores.

Resource: Register with the HHQI National Campaign to access this and other educational and training tools for your agency at www.homehealthquality.org.
