

## OASIS Alert

### Clip'N' Save: Audit your ACUTE CARE HOSPITALIZATION CHARTS WITH THIS TOOL

**Jumpstart your work on this hard-to-change measure.**

Quality Improvement Organizations are asking you to reduce acute care hospitalizations, and pay for performance will make your outcomes more important than ever.

Agencies looking for a tool to help in their focused clinical record review for improving this outcome (see OASIS Alert, Vol. 5, No. 12 and Vol. 6, No. 1) can get a helping hand from the **Iowa Foundation for Medical Care**.

Use these audit questions during the investigation and/or the monitoring phase of your outcome-based quality improvement efforts.
