

## OASIS Alert

### Tool: Improve OASIS Data Collection with an Assessment Form

Conducting the comprehensive assessment is complicated enough without worrying about how your findings translate to OASIS data. Consider using a form that gathers the data you'll need so you can streamline OASIS completion. The following form, from **Capstone Clinical Services** in Sandy, Utah, offers an example.

Note: For permission to use this form, please contact **Amy Hartman, BSN, RN, COS-C**, with Capstone at [capstoneclinical@gmail.com](mailto:capstoneclinical@gmail.com). This form is not meant to replace a specific agency's policy or procedure for conducting the comprehensive assessment. It is intended to be a tool to facilitate accuracy and efficiency in completing the start of care assessment.
