

Health Information Compliance Alert

Toolkit: Kick Off Your Cybersecurity Action Plan With This Checklist

Remember to plan for the unexpected using good backup practices.

With so many large, highly publicized HIPAA breaches in the news these days, you need to bump up your cybersecurity game if you don't want your organization to become the next headline. Take these nine steps, prescribed by the HHS Office of the National Coordinator for Health Information Technology (ONC), to ensure that you're doing everything possible to put in place effective cybersecurity protections.
