

HIPAA Accredited Standards Committee X12 270/271 health care eligibility inquiries (270) and responses (271) on a real-time basis. HETS allows health care providers or their designees to check Medicare beneficiary eligibility data in real-time. They use HETS to prepare accurate Medicare claims, determine beneficiary liability, or check eligibility for specific services. HETS allows users to submit HIPAA compliant 270 eligibility request over a secure connection and receive 271 responses in real-time. In creating the HETS system, Federal law requires that CMS take precautions to minimize the security risk to Federal information systems. Accordingly, CMS requires that trading partners who wish to connect to the HETS 270/271 system via the CMS Extranet and/or internet to agree to the HETS Rules of Behavior and the HETS Authorized Representative Roles and Responsibilities terms as a condition of receiving Medicare eligibility information. Applicants complete the entire Trading Partner Agreement form to indicate agreement with CMS trading partner terms and provide sufficient information to establish connectivity to the service and assure that those entities that access the Medicare eligibility information are aware of applicable provisions and penalties for the misuse of information.

CMS uses the Trading Partner Agreement Form to capture certain information whereby a person certifies that they are fully aware of all penalties related to the use of PHI and their access to this data from the HETS application. The information is an attestation by the authorized representative of an entity that wishes to access the Medicare eligibility information to conduct real-time eligibility transactions. The authorized representative is a person responsible for business decisions on behalf of the Organization who is submitting the access request. The data captured includes the authorized representative's name, title contact number and the name of the submitting entity. Other data captured is the submitter's National Provider Identifier, business name, billing address, physical address, and telephone number.

The Trading Partner Agreement Form is also used by CMS to capture certain information whereby a person identifies the particular connectivity protocol that they will use to connect to CMS and specific organization information which is reviewed and authorized prior to the access being granted. *Form Number:* CMS-10157 (OMB control number: 0938-0960); *Frequency:* Yearly; *Affected Public:* Private Sector, State, Local, or Tribal Governments, Federal
